

## RCRA CORRECTIVE ACTION STABILIZATION QUESTIONNAIRE

Completed by: Fuad Marmash  
Agency: MDNR - Hazardous Waste Program  
Date: August 28, 1996

### Background Facility Information

Facility Name: SKF Industries  
EPA Identification No.: MOT 300 010 345  
Location (City, State): St. Louis, MO  
NCAPS Priority Rank: Low

1. Is this checklist being completed for one solid waste management unit (SWMU), several SWMUs, or the entire facility? Please explain.

The entire facility has been evaluated.

### STATUS OF CORRECTIVE ACTION ACTIVITIES AT THE FACILITY

2. What is the current status of HSWA corrective action activities at the facility? (check all that apply)
- ( ) No corrective action activities initiated
- (X) RCRA Facility Assessment (RFA) or equivalent completed
- ( ) RCRA Facility Sampling (RFS) completed
- ( ) RCRA Facility Investigation (RFI) completed
- ( ) Corrective Measures Study (CMS) completed
- ( ) Corrective Measures Implementation (CMI) begun or completed
- ( ) Interim Measures begun or completed
3. If corrective action activities have been initiated, are they being carried out under a permit or an enforcement order?
- ( ) Operating permit
- ( ) Post-closure permit
- ( ) Enforcement order
- ( ) Other (describe)
- No action has been taken.
4. Have interim measures, if required or completed (see Question 2), been successful in preventing the further spread of contamination at the facility?
- ( ) Yes
- ( ) No
- ( ) Uncertain; still underway
- (X) Not Applicable

### CONTINUE TO QUESTION 5 ONLY IF THE FOLLOWING CONDITIONS ARE MET:

- I The facility has been ranked using the National Corrective Action Prioritization System (NCAPS);

### AND

- I Interim Measures have not been initiated, or if initiated, have not been successful in preventing the further spread of contamination at the facility.

### FACILITY RELEASES AND EXPOSURE CONCERNS

5. To what media have contaminant releases from the facility occurred or been suspected of occurring?

( ) Groundwater

( ) Surface water

( ) Air

( ) Soil

( ) Sediment

No release of contaminants has been detected.

6. Are contaminant releases migrating offsite?

( ) Yes; Indicate media, concentrations, and level of certainty.

(X) No

( ) Uncertain

- 7a. Are humans currently being exposed to contaminants released from the facility?

( ) Yes

(X) No

( ) Uncertain

- 7b. Is there a potential for human exposure to contaminants released from the facility over the next five to ten years?

( ) Yes

(X) No

( ) Uncertain

R00038126  
RCRA Records Center

8a. Are environmental receptors currently being exposed to contaminants released from the facility?

- ☐ Yes  
☒ No  
☐ Uncertain

8b. Is there a potential that environmental receptors could be exposed to contaminants released from the facility over the next five to ten years?

- ☐ Yes  
☒ No  
☐ Uncertain

#### ANTICIPATED FINAL CORRECTIVE MEASURES

9. If already identified or planned, would final corrective measures be able to be implemented in time to adequately address any existing or short-term threat to human health and the environment?

- ☐ Yes  
☐ No  
☒ Not Applicable

Additional explanatory notes:

Evidence of release was not apparent during the sampling visit.

10. Could a stabilization initiative at this facility reduce the present or near-term (e.g., less than two years) risks to human health and the environment?

- ☐ Yes  
☐ No  
☐ Uncertain  
☒ Not applicable

Additional explanatory notes:

11. If a stabilization activity were not begun, would the threat to human health and the environment significantly increase before final corrective measures could be implemented?

- ☐ Yes  
☒ No  
☐ Uncertain

Additional explanatory notes:

#### TECHNICAL ABILITY TO IMPLEMENT STABILIZATION ACTIVITIES

12. In what phase(s) are contaminants known to exist under ambient site conditions?

- ☐ Solid  
☐ Light non-aqueous phase liquids (LNAPLs)  
☐ Dense non-aqueous phase liquids (DNAPLs)  
☐ Dissolved in groundwater or surface water  
☐ Gaseous  
☐ Other \_\_\_\_\_

No contaminant was detected during the sampling visit.

13. Are one or more of the following major chemical groupings of concern at the facility?

- ☒ Volatile organic compounds (VOCs) and/or semi-volatiles  
☐ Polynuclear aromatics (PAHs)  
☐ Pesticides  
☐ Polychlorinated biphenyls (PCBs) and/or dioxins  
☐ Other organics  
☒ Inorganics and metals  
☐ Explosives  
☐ Other \_\_\_\_\_

14. Are appropriate stabilization technologies available to prevent the further spread of contamination, based on contaminant characteristics and the facility's environmental setting? (See Attachment A for a listing of potential stabilization technologies.)

- ☒ Yes: Indicate possible course of action.

No action is required.

- ☐ No: Indicate why stabilization technologies are not appropriate.

15. Has the RFI, or another environmental investigation, provided the site characterization and waste release data needed to design and implement a stabilization activity?

- ☐ Yes  
☒ No

If No, should efforts be made to obtain this data in advance of the data needed to implement final corrective measures?

- ☐ Yes  
☒ No

TIMING AND OTHER PROCEDURAL ISSUES  
ASSOCIATED WITH STABILIZATION

16. Considering all technical and administrative factors, would it be environmentally beneficial to pursue implementation of stabilization activities more quickly than the final corrective measures?

( ) Yes  
(X) No  
(X) Not Applicable

Additional explanatory notes:

No releases evident.

17. Can stabilization activities be incorporated into the final corrective measures at some point in the future?

(X) Yes  
( ) No  
( ) Uncertain

Additional explanatory notes:

Conceptually yes; however, there no reason to pursue stabilization.

CONCLUSION

18. Is this facility an appropriate candidate for stabilization activities?

( ) Yes (YE)  
( ) No, not feasible (NF)  
(X) No, not required (NR)  
( ) Insufficient information (IN)

Explain final decision, using additional sheets if necessary.

Stabilization measures do not appear necessary at this time since contaminant releases were not indicated by the RFA sampling results nor is there other substantial evidence of releases.

CA225 - Stabilization Measures Evaluation  
RCRIS Status Codes Explanation

YE = Facility is amenable to stabilization activity based on status of corrective action work, technical factors, degree of risk and timing/administrative considerations.

NF = Facility is not amenable to stabilization activity at the present time because it appears to be technically infeasible or inappropriate.

NR = Facility is not amenable to stabilization activity at the present time for reasons other than it appears to be technically infeasible or inappropriate (NF) or there is a lack of technical information (IN). Reasons for this may be the status of closure at the facility, the degree of risk, timing considerations, the status of corrective action work at the facility, or other administrative considerations.

IN = Facility is not amenable to stabilization activity because of a lack of technical data. An evaluation has been completed but further data is necessary to determine stabilization measures feasibility or appropriateness. This status should be changed when data becomes available.
